

Sanderson, H. N. Shapiro, F. P. Schofield, C. Shaw, G. M. J. Slot, S. B. H. Sofi, S. Somasundram, S. D. Sturton, W. A. Turner, *Kathleen S. Vine, N. V. Wadsworth, A. D. Weedon, C. J. L. Wells, J. S. White, Kathleen M. Wilkinson, D. W. Winnicott, Jane E. Wood.

* L.R.C.P. diploma not yet conferred.

† M.R.C.S. diploma granted on November 11th, 1919.

An examination in Public Health, Parts I and II, will be held in April next, commencing on the 19th and 26th respectively.

Obituary.

DR. HELEN MOORE, who was in charge of the Church of England Zenana Mission Hospital at Sukkur, Sindh, has died of septic influenza. She entered the London (Royal Free Hospital) School of Medicine for Women in the spring of 1897, and graduated M.B.Lond. in 1902. She first went to India at the end of 1905, taking temporary work in the Church of England Zenana Mission Hospital in Bangalore for over two years. After a time in England she returned to India and worked in the Church of England Zenana Mission hospitals in Bangalore, Quetta, and in Khammamett in the Nizam's Dominions; of this last hospital she was in charge during the furlough of another doctor. In 1912 she was appointed to the Church of England Zenana Mission hospital in Sukkur as the first qualified medical woman there, and, except during a furlough of some months in 1914-15, she remained there till her death. In her work in India she was much beloved by fellow workers and patients. Her mental power was great, and her charm of manner endeared her to all who were privileged to know her. Her death is a great loss both to Sukkur, where there is no medical woman to take charge of the Mission Hospital, and to her many friends.

MR. A. REGINALD F. EVERSHED, M.R.C.S., L.R.C.P., died on January 25th at Parkstone, aged 55, from bronchopneumonia following an attack of influenza. He was the eldest son of the late Dr. Arthur Evershed. He studied medicine at Guy's Hospital, and joined his father at Hampstead for a short time before starting practice in Penzance. After establishing a large connexion the work proved too great for his health, and he went to London, where he was able to fulfil his ambition to specialize as an oculist. After six years in the City he removed to Harley Street, where his practice so greatly increased that it was a bitter disappointment to be forced to withdraw from his work by a breakdown in health in November, 1919. Among appointments he held were honorary oculist to the Cripples' Home, Winchmore Hill, oculist to the Stock Exchange Benevolent Fund, honorary oculist to the Brixton Dispensary, and for many years clinical assistant at the Royal Westminster Ophthalmic Hospital. His work was well known to amateur photographers, especially among members of the Camera Club (in the resuscitation of which he was instrumental) and the South London Photographic Society. As a member of an old Sussex family he helped in the institution of the "Men of Sussex" Society.

CAPTAIN WILBERFORCE VAUGHAN EAVES, M.B.E., R.A.M.C., died on February 10th in a nursing home, after an operation, aged 52. He was born in Australia in 1867, but came to England in early life, and took the M.R.C.S. and L.R.C.P.Lond. in 1889, subsequently the M.R.C.P. and M.D. He served in the South African war, and took a temporary commission in the R.A.M.C. in the first week of the late war, on August 10th, 1914, being promoted to captain after a year's service. For most of his service he was employed at Woolwich Arsenal. He was well known as a lawn-tennis player. He was in the very first rank for over twenty years, and retained his skill to a much later age than most men. Though he never succeeded in winning the championship, he came within one point of doing so, against Mr. W. Baddeley, in 1895. In his time he had gained the championships of Scotland, Ireland, Wales, New South Wales, and Victoria; he won the covered courts championship in 1897-98-99, represented England against Ireland in 1895 and 1896, was a member of an English team which played against America in 1897, and of the All England team which toured in South Africa in 1908-09, and represented the British Isles in the Davis Cup matches of 1907.

Medical News.

A CONFERENCE of the medical superintendents of sanatoriums, training colonies, and other residential institutions for cases of tuberculosis will be held on Monday, February 23rd, at 4 p.m., at 122, Harley Street, to discuss the problems which specially concern such institutions, and to consider by what machinery similar periodical conferences may be arranged.

AN Order in Council, dated February 9th, 1920, and made under the provisions of the Anthrax Prevention Act, 1919, prohibits the importation into the United Kingdom of shaving brushes manufactured in, or exported from, the Empire of Japan, whether such shaving brushes are exported direct to the United Kingdom or otherwise. This Order may be cited as the Anthrax Prevention (Shaving Brushes) Order, 1920.

THE Ministry of Health has set up a Joint Committee representing the departmental Advisory Committee on the Welfare of the Blind and the National Institute for the Blind, of which Sir Arthur Pearson is president, in order to co-ordinate effort and to advise on the grants the Ministry now makes in aid of the blind. It is hoped that ways of diminishing overlapping and preventing waste of effort in the collection of voluntary contributions will be devised.

THE Automobile Association is organizing a petition to the Prime Minister protesting against the present high price of motor spirit, which is as much a national necessity as gas or electricity, and praying that legislation may be at once introduced to ensure the immediate production of benzol and power alcohol in large quantities. Copies of the petition can be obtained from the Secretary at Fannum House, Whitcomb Street, London, W.C.2.

THE President of the French Republic has conferred the Cross of Officer of the Legion of Honour on Dr. James H. Nicoll, consulting Surgeon to the Western Infirmary, and Rector's Assessor in the University Court from 1914 to 1919. The Royal permission to accept and wear the decoration has been granted to Dr. Nicoll.

THE anniversary dinner of the Medical Society of London will be held at the Wharnclyffe Rooms, Hotel Great Central, Marylebone, on Wednesday, March 17th, at 7.30 o'clock.

TWO Emeritus Lectures will be delivered at the Middlesex Hospital Medical School, the first, by Sir Alfred Pearce Gould, K.C.V.O., F.R.C.S., on February 26th, and the second, by Sir Richard Douglas Powell, Bt., K.C.V.O., M.D., F.R.C.P., on March 5th. The lectures will be delivered at 3 p.m. on each day.

OFFICERS who were attached to No. 20 General Hospital, B.E.F., during the war, will dine together in London on Saturday, March 13th. The chair will be taken by Major-General Guise Moores, C.B., C.M.G., A.M.S., now Commandant of the Royal Army Medical College. Those who wish to attend are asked to write to Dr. H. Drinkwater at 7, Cavendish Place, London, W.1.

THE Federation of Medical and Allied Societies will give a dinner at the Café Royal, Regent Street, on Wednesday, February 25th, when Lord Dawson of Penn (Sir Bertrand Dawson), G.C.V.O., K.C.M.G., C.B., M.D., will be the guest of honour. Dr. Addison, Lord Astor, and Sir Robert Morant are among those intending to be present.

THE Silvanus Thompson Memorial Lecture of the Röntgen Society will be delivered on March 2nd by Professor W. H. Bragg, C.B.E., F.R.S. The subject is "Analysis by x rays." A discussion on electric apparatus in relation to x rays will take place at a joint meeting of the Röntgen Society, the Institution of Electrical Engineers, and the Therapeutic Section of the Royal Society of Medicine on Thursday, February 26th. The meeting will be held at the Royal Society of Medicine at 5 p.m., when Dr. Reginald Morton will open the discussion.

AT the meeting of the Zoological Society of London on February 10th, Mr. F. Martin Duncan, F.Z.S., demonstrated a series of photomicrographs of acari from the lungs of *Macacus rhesus*, illustrating the larval, nymph, and adult stage of the acarid. Both young and adult monkeys appeared to be infected, but so far as his observations had gone, the presence of the mites in the lungs had in no case been the cause of death. Eggs had not been observed in the vesicles formed by the presence of the mites, though serial sections of adult acarids had shown the egg in an advanced state of development, pointing to the probability of this stage being completed within the body of the female.
